Multidisciplinary care tools & proformas

A series of tools and proformas have been developed to assist in the implementation of multidisciplinary care.

The following documents were designed by National Breast and Ovarian Cancer Centre* to provide examples of areas to include in tumour specific forms at the local level. They have been provided as Word documents to enable editing.

- **Patient information sheet**
  
  Template for a patient information sheet describing the multidisciplinary care process. Designed to be used in conjunction with a consent form.

- **Meeting attendance register**
  
  Template for an attendance register to document attendance by multidisciplinary team members and visitors at multidisciplinary team meetings.

- **Treatment plan proforma**
  
  Generic treatment plan proforma designed to document treatment recommendations and actions arising from multidisciplinary treatment planning meetings.

- **GP notification** - outcome of MDC meeting
  
  Template for an information sheet documenting treatment recommendations to be sent to the patient’s GP following a multidisciplinary treatment planning meetings.
